

***SPEZITRANS***  
***Logistic Services***

**FOR YOUR LOGISTICS:**

**TRANSPORT AND WAREHOUSING  
SERVICES WHICH GO BEYOND  
ORDINARY LOGISTICS**

# ABOUT SPEZITRANS

Specialist logistics are our passion and we love complicated jobs. Nothing is too big, too heavy, too sensitive or too complex for us. If your transport and logistics challenges go beyond standard requirements, we would love to take them on and support you with safe and reliable holistic services.

We are a subsidiary of the TALKE Group with more than 155 employees at sites in Berlin, Dresden, Erfurt, Krefeld, Magdeburg, Oberhausen, Siegen, Vlaardingen and Enschede, as well as our head office in Grimmen in northern Germany. Any time you need our assistance, we are always at your disposal.

## WELCOME TO SPEZITRANS,

Your specialist logistics company for transport and warehousing services above and beyond the ordinary.

We offer a large number of services, including special handling of sensitive and heavy goods. You can take advantage of what we already offer or work together with us to find customised, safe and efficient answers to your specific requirements.

Use this brochure to find out about the full spectrum of services we can provide.

If you have a logistics job which does not match anything on the following pages, you can still tell

us about it. In conjunction with our parent company ALFRED TALKE Logistic Services and numerous partners, both in our home territory and the whole of Europe, we would be delighted to tailor a special logistics solution just for you.

Get to know us!

ISO 9001:2008  
GMP+  
EFB  
SQAS (via TALKE)

## OUR QUALITY

We are independently certified. From transportation of animal feed to temperature-controlled hazardous materials, from express to heavy transport – all our transport and logistics services are backed by that independent seal of quality.

The all-embracing quality standard is ISO 9001:2008. For animal feed transport we also comply with GMP+ and we are also a certified specialist disposal company. When further standards are required, within the TALKE Group network we can offer services which meet the provisions of SQAS, ISO 22000, HACCP and AEO.

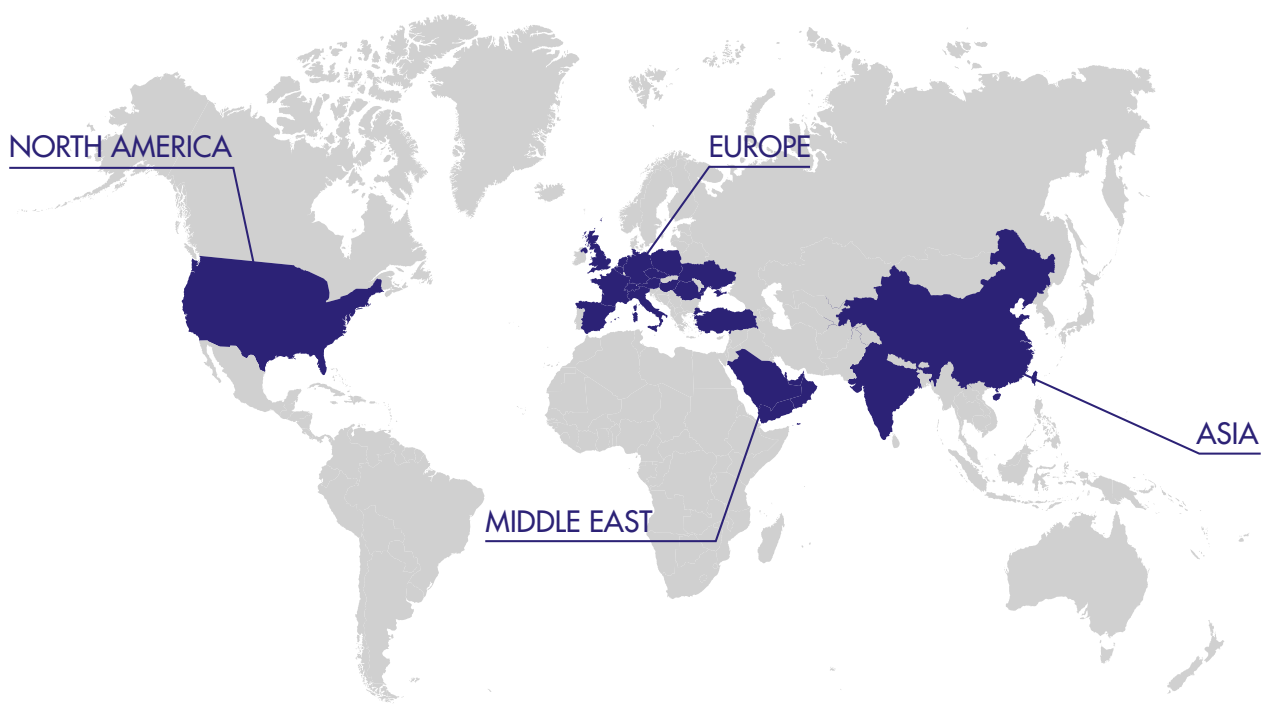

## OUR RANGE

As a specialist for transport and warehouse services above and beyond the ordinary, we always go right to those places where our service is required – to exactly where you need it.

Efficient and interconnected: With ten locations, we offer the availability of specialised logistics services throughout Germany and beyond. From us you get international coverage thanks to cooperation between ourselves and our parent company ALFRED TALKE Logistic Services, as well as a tried and tested network of other logistics specialists.

## TALKE-GROUP WORLDWIDE

# TRANSPORT

We bring your goods to their destination. Whether solid, liquid or gaseous, whether food, heavy lift cargo or waste – for every transport task, we use our expertise

# ABSOLUTELY SAFE:

## TRANSPORT OF HAZARDOUS MATERIALS

Regardless of the aggregate state, we can transport both harmless and hazardous solid and liquid chemicals and gases of almost all dangerous goods classes to wherever you need. We offer the necessary experience

and sensitivity for transporting your products safely and the capacity and flexibility to bring them to their destinations throughout Europe.

### HAZARDOUS MATERIALS OF ALMOST EVERY CLASS

The only exceptions are explosive, radioactive and infectious materials.

CLASS 2

CLASS 3

CLASS 5.1

CLASS 8

CLASS 4.1/4.2/4.3

CLASS 6.1

CLASS 9

ENVIRONMENTALLY  
HAZARDOUS SUBSTANCES

## SIGNED AND SEALED: SPECIALIST DISPOSAL

As a certified disposal company, we also offer the necessary expertise in this sector to transport waste for you in an uncomplicated and reliable way and to handle the requisite formalities. We can therefore provide you with the appropriate transport services over the entire life cycle of a product if needed.

## HEAVY TRANSPORT AND CRANE LIFTING

We also offer you services for moving particularly bulky and heavy objects. We can handle transport and crane lifting up to a weight of 500 tonnes both safely and reliably.

# GENERAL CARGO AND FULL-LOAD TRANSPORT

You can obtain comprehensive shipment service packages from us for general cargo and full-load transport far beyond our region. In close cooperation with carefully selected partners, we can support you with national and international transport in accordance with our high quality and safety standards.

## STORAGE

We offer extensive storage capacities for an extremely wide variety of goods – monitored round the clock by video and regular inspections. Our open storage covers a total area of 80,000 square metres and includes special areas for storing pipes and other lengthy items. With more than 10,000 square metres of covered warehouse space, including a steel storage facility, we also offer reliable weather protection.

## GAS TANK REGENERATION

Reliable, long-lasting corrosion protection is one of the basic requirements for operating above-ground gas tanks.

To renovate such tanks, we offer a complete all-round service: collection, temporary storage, removal of old coatings, application of new coatings, replacement of seals, pressure gauges and fastening materials, plus delivery to the new location where they are to be used.

All gas tanks are subjected to an independent inspection by an officially authorised expert before we send them on their way to their new sites.

## VEHICLE WORKSHOP

Repairs, tyre service and 24-hour breakdown service: You can obtain all workshop services for tractor units, tankers, trucks and cars from us from a single source. In addition, we offer all statutory general and safety inspections, brake tests and emissions testing.

## RAILWAY SIDING

Our own rail siding at our headquarters in Grimmen offers you direct access to the German Railways network. 1,500 metres of track, including a station, loading ramp, self-unloading area and a run-around loop are available for handling your goods, plus our fenced temporary storage covering an area of 50,000 square metres.

## EARTHWORKS AND UNDERGROUND ENGINEERING

We are the experts for your earth moving, redevelopment and disposal work. Our range of services extends from taking on individual tasks, such as removing excavated material, right through to project work, such as the backfilling of bore holes by supplying, applying and compacting the backfill.

# ABOUT TALKE

ALFRED TALKE Logistic Services is one of the leading logistics service providers for the chemical and petrochemical industries. Companies in Europe, the Gulf states, India, China and the USA trust in the performance capability, expertise and 70 years' experience of more than 2,400 transport and logistics specialists.
